

## Sport Risk Assessment:

Low Risk	Sports that can be done with social distancing or individually with no sharing of equipment or the ability to clean the equipment between use by competitors.
Moderate Risk	Sports that involve close, sustained contact, but with protective equipment in place that may reduce the likelihood of respiratory particle transmission between participants OR intermittent close contact OR group sports OR sports that use equipment that can't be cleaned between participants.
High Risk	Sports that involve close, sustained contact between participants, lack of significant protective barriers, and high probability that respiratory particles will be transmitted between participants.

**Moderate and High Risk sports can still be active during early phases through individual skills training and development.**
